

IntelDNA

Reporting that answers the question you asked

Banded reports and analysis across everything the suite holds, without exporting to a spreadsheet first.

WHAT IT DOES

- Banded report designer with grouping and totals
- Run, share and schedule
- Reads across modules — one question, one answer
- Drill from a number to the records behind it
- Export where you genuinely need to
- Permissions that respect who may see what

Who it is for. Owners and managers who want the number and its source.
